CREDIT SUISSE

Electronic account statement in SWIFT standard (MT940/MT942)

The basis for efficient liquidity management

Information for companies wishing to automate their account reconciliation and booking processes.

Your needs
Electronic account statements in the SWIFT standard enable the fully automated scanning of payment transaction credits and debits, as well as any other account movements, into your software solution. This gives you a daily overview of all your account movements and enables you to improve the automation of downstream business processes. In addition to the operational advantages, there are clear financial advantages due to the reduction of manual effort, the reduction in the number of errors, and the opportunities for improved liquidity management. You can keep track of your booking positions, including their maturities, during the day and can thus make timely financial decisions.

Our solution
Depending on your needs, we can provide you with a SWIFT account statement at the end of the day (MT940) or periodic statements during the day (MT942). A combination of both statement versions is also possible. Physical account statements are therefore no longer necessary, as the delivered SWIFT reports meet the regulatory requirements and are implemented in accordance with the current SWIFT release.

Your benefits
- Automatic scanning and reconciling of account bookings into your software solution
- Quick overview of available liquidity within your accounts with Credit Suisse
- Operational advantages: reduction of manual processes and reduction of accounting errors
- Financial advantages: optimization of liquidity management through up-to-date account balances during the day
- Simplified and automatic account reconciliation
- Daily up-to-date overview of available financial resources
- Discontinuation of physical account statements

Requirements and conditions

Electronic account statements in SWIFT format can be ordered for all common account types. They can be obtained via the following channels:

- Online Banking Direct Net
- Direct Link
- Direct Exchange
- SWIFT FIN/FileAct
- ARS (Fides Treasury Services AG)

Structure of field 86 at Credit Suisse (Switzerland) Ltd.

A unique booking text code (Extended Product Code – EPC) denotes each business case. The codes are assigned according to the number groups of a business type. The detailed lists of the individual EPCs can be found at www.credit-suisse.com/directlink. We recommend that you download the latest version of the EPC list regularly in order to make it possible for new codes to be assigned, too.

Extended Product Codes (EPC)

EPC	Value area/group
1000–1500	Payment transactions
1501–1999	Check
2000–2999	Securities
3000–3299	Treasury/money market
3300–3599	Treasury/foreign exchange
3600–3999	Treasury/precious metals
4000–4999	Credit business
5000–5999	Mortgages
6000–6999	Counter
7000–7999	Various charges/commissions
8000–8999	Miscellaneous

Trigger tags

After the EPC, additional information regarding the transaction is divided using trigger tags. One example of this is the conversion rates for foreign currency transactions in trigger tag 24.

Trigger tags	Designation
05	Transaction reference
20	Form text
21	Your reference
22	Client reference
23	Account at (bank check: drawee bank)
24	Conversion text
25	Our charges
26	Third-party charges
27	Total charges
28	VAT
32	Client
33	Beneficiary
60	Reason for payment
61	Free text
62	Special text
63	Original instructing party
99	Additional booking information
